

Oceana SERIES

The Beam Inmarsat Oceana Series are versatile terminals designed to operate with the Inmarsat GSPS, FleetPhone and IsatPhone Link SIM cards, which make them ideal for land or sea communications.

Oceana 800 OC800

Beam Oceana 800 is an all in one satellite communications terminal featuring an intelligent POTS/RJ11 interface, integrated GPS engine providing tracking and Instant Message reporting.

It has accessible control buttons with intuitive LCD screen, inbuilt speakerphone and secondary SIM socket making it a highly featured satellite terminal.

APPLICATIONS

Oceana 400 OC400

Beam Oceana 400 is a cost-effective, high quality, slimline satellite terminal.

The terminal was purposely designed for maritime applications to meet an IP53 ingress rating making the terminal suitable for on-board vessel communications. The terminal can also easily be used in any land based fixed site application.

APPLICATIONS
