BEAM RECEIVES SIXTH IRIDIUM GO![®] ORDER

Highlights:

- **Beam receives a new order from global satellite partner Iridium Communications Inc.**
- **The new order of 5,000 Iridium GO! units will bring the total ordered over the past five years to 40,000**
- **Further orders are anticipated following the US\$3bn upgrade of the Iridium satellite network**
- **Beam well placed to return to profit in FY2019 and beyond**

Beam Communications Holdings Limited (ASX: BCC) is pleased to announce that it has received a new order from leading mobile satellite services company **Iridium Communications Inc** (NASDAQ:IRDM).

The order for an additional 5,000 Iridium GO! units will take the total number ordered to 40,000 units and marks the sixth contract for the portable voice and data satellite device since it was first designed and manufactured by Beam in mid-2014.

This new order further bolsters Beam's sales pipeline, with the company on track to return to sustained profitability in the current financial year.

The product life-cycle of Iridium GO! is significantly longer than other communications devices, largely due to its rugged design and ongoing creation of custom applications (Apps) for weather, mail and maritime charting, just to name a few.

"We are very pleased with the strong demand for Iridium GO! and look forward to its continued popularity, particularly after the recent completion of our US\$3 billion satellite constellation upgrade campaign, known as Iridium NEXT," said Bryan Hartin, executive vice president, sales & marketing at Iridium. "Completion of Iridium NEXT has assured our customers that the reliable and critical lifelines that Iridium provides will continue uninterrupted, as we remain the only communications company of any type with real-time, truly global coverage."

Delivery of the Iridium GO! units from this latest order is expected to be completed by the end of the first half of the 2020 financial year.

Beam is also pleased to confirm that it is on track to meet the product delivery schedule of the previous order from Iridium (announced in July 2018), which is expected to be completed in second half of the 2019 financial year.
